

# **A project for the establishment of the Institute of Homeopathic/Ecologic Pharmacology - IHEcoP**

**Dumitru DOBRESCU, M.D.**

*Pharmacology and Homeopathy Professor  
PhD in medical sciences, Homeopathic physician, licensed in Pharmacy  
Corresponding member of the Romanian Academy  
Titulary member of the Romanian Academy of Health Sciences  
Correspondence email: dumitru\_dobrescu@hotmail.com*

## **Abstract**

This article discusses the establishment of a homeopathic pharmacology international institute that would be the first scientific establishment of this kind in the world, representing the birth of a new medical science, which will benefit the profound improvement of human health. The author presents the objectives of such an institution, proposing a structure and other key elements.

*Keywords: Homeopathy, pharmacology, , homeopathic pharmacology, research*

## **Rezumat**

Articolul de fata ia in discutie infiintarea unui institut international de farmacologie homeopata care ar reprezenta prima unitate stiintifica de profil din lume, punctand astfel nasterea unei noi stiinte medicale, care va contribui la imbunatatirea radicala a sanatatii umanitatii. Autorul prezinta obiectivele unui astfel de institut, propune o structura pe departamente precum si alte elemente cheie.

*Cuvinte cheie: Homeopatie, farmacologie, farmacologie homeopata, cercetare*

## **INTRODUCTION**

### **1. Obiectives**

- The establishment of a new medical science, homeopathic pharmacology (ecologic) by resemblance to allopathic pharmacology.

Arguments:

**Allopathy is a therapeutic method based on the allopathic drug.**

**The study of the allopathic drug is conducted by allopathic pharmacology, a medical science. Thus, allopathy is allopathic pharmacology applied in therapeutics. There is no allopathy book but there are many allopathic pharmacology books.**

**Homeopathy is a therapeutic method based on the homeopathic drug. The study of the homeopathic drug should be made using homeopathic pharmacology, which is still not official. Thus homeopathy is homeopathic pharmacology applied in therapeutics.**

**There are hundreds of books on homeopathy, presenting the homeopathic drugs in a chaotic manner, without regard to the principles of pharmacology. This is why homeopathy is considered "alternative medicine" and "complementary medicine" and is therefore outside of medicine. The superior necessity for the existence of homeopathic pharmacology results, as the science of the homeopathic drug, which could order the homeopathic drug science and make it an equal to the allopathic medicine, in the whole collective scientific medication therapy.**

- Upgrading homeopathy and bringing it to the level of a medical science of the 21<sup>st</sup> century, using the

experience gained wide allopathic pharmacology.

- Recognition of the existence of homeopathic pharmacology (ecologic), nationally and internationally.
- Introduction of the homeopathic pharmacology study in the curricula of faculties of medicine in Romania and other countries, so that all physicians would be able to prescribe both allopathic medicines and homeopathic ones, in ambulatory and hospitals, exclusively based on scientific criteria.
- Supporting the appearance of the Romanian Society of Homeopathic Pharmacology, which will be the first of its kind in the world.
- Supporting the regular appearance of the world's first homeopathic pharmacology journal, under the name First Journal of Homeopathic Pharmacology

## **2. IHecoP STRUCTURE**

IHecoP is organized into departments supervised by directors. Within these departments, subdivisions are present, consisting of researchers and/or other employees.

### **2.1. IHecoP leadership**

General Manager

The Scientific Board consists of the General Manager and department directors. Every six months by rotation, department directors will fill in the honorary position of deputy general manager.

The Management Board, consisting of members of the Scientific Board and all heads of department.

## 2.2. Academic-Teaching Department

### Objectives

#### **2.2.1. Developing the world's first treaty of homeopathic pharmacology (ecological), edited by Professor Dumitru Dobrescu**

The treaty will be organized into chapters according to allopathic medicines ATC classification of the World Health Organization.

Development of the treaty was started by prof. Dobrescu which published;

- Chapter 1, General homeopathic pharmacology (Ecologic) (2007 Romanian 1<sup>st</sup> edition, 2008 English edition, 2011 French 2<sup>nd</sup> edition, 2011 Romanian 3<sup>rd</sup> edition).
- Chapter 2, Respiratory system, 2010.

The other chapters, that should be developed in the IHecoP will be:

- Chapter 3 Digestive system and metabolism
- Chapter 4 Blood and hematopoietic organs
- Chapter 5 Cardiovascular System
- Chapter 6 Dermatological pharmacology
- Chapter 7 Genitourinary system
- Chapter 8 Hormone pharmacology
- Chapter 9 Anti-infectives
- Chapter 10 Antineoplastic and immunomodulating
- Chapter 11 Musculoskeletal System

- Chapter 12 Central Nervous System
- Chapter 13 Antiparasitics
- Chapter 14 Sensitive Organs
- Chapter 15 Miscellaneous

N.B. Specialists of this department will be temporary employees, for periods of six months on average, for the time required writing a chapter. After this period, some of them will remain committed to new contracts in order to organize postgraduate courses of homeopathic pharmacology.

## 2.3. Pharmacotoxicology department

- 2.3.1. Department of classical provings
- 2.3.2. Department of modern provings (allopathic type research model)
- 2.3.3. Department of molecular and / or cellular provings

## 2.4. Pharmacotherapy Department

- 2.4.1. Department of new drugs
- 2.4.2. Department of occupational diseases
- 2.4.3. Department of reversibility = regeneration
- 2.4.4. Department of mental illness
- 2.4.5. Department of tumor diseases

## 2.5. Pharmacography Department

- 2.5.1. Potency department
- 2.5.2. Length of action department

## 2.6. External Partnership Affairs Department

- 2.6.1. Contracts and conventions department.

## 2.7. Administration Department

- 2.7.1. Personnel
- 2.7.2. Logistics
- 2.7.3. Legal department

### 3. Required spaces (725 sqm)

1. General manager (15)
2. Advisor (15)
3. Secretariat (15)
4. Entrance hallway and doorman (40)
5. Cloakroom (80)
6. Central hallway (60)
7. Laboratories ( 10 rooms x 30 = 300)
8. Administration (2 camere= 60 mp)
9. Library (40)
10. Audiovisual Service (30)
11. Conference room (50)
12. External relations (20)

### 4. Personnel

- General manager
- Advisor
- Secretary - 3
- Doormen - 3
- Academic department - 12
- Pharmacotoxicology Dept. - 4
- Pharmacotherapy Dept. - 5

- Pharmacography Dept. - 2
- External Relations - 1
- Administration - 2
- Library -1 Total 33

### 5. Equipment and facilities

- Computers - 40
- Desk - 35
- Chairs - 70
- Conference room table
- Lockers - 40
- Filing Shelves
- Document cabinets
- Homeopathy books - 100
- library shelves

*Observation.* Given the importance of the objectives of the Institute of Homeopathic Pharmacology for global human health, the grants suggestion for the establishment and its maintenance is justified in the international fora, for example the European Union.
